**DETAILED ACTION**

1. Claims 7-16, 18-26 and 30-32 are pending.

Claims 7-16, 18-26 and 30-32 are rejected.

Claims 1-6, 17 and 27-29 are canceled.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 7-16, 18-26 and 30-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation "is a compound in which X in the first allyl compound is substituted with AO" in reference to the second allyl compound, is not disclosed in the original specification. The AO group is only used in reference to the oxygen nucleophilic agent.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 7-9, 11, 14, 15, 18, 22-24, and 30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Trost et al. (US 4,051,157), for the reasons given in the previous office action, mailed March 21, 2006.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
8. Claims 7-16, 18-26 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurtz et al. (US 3,755,451) alone or in view of Bryant et al. (US 3,534,088) or Hefner, Jr. (US 4,613,703), for the reasons given in the previous office action mailed March 21, 2006.

**Response to Amendment**

**Objection to claim 15**

9. The objection to claim 15 is withdrawn due to the amendment to said claim filed August 21, 2006.

**Rejection of claims 7-16, 18-26 and 30-32 under 35 U.S.C. 112, second paragraph**

10. The rejection of claims 7-16, 18-26 and 30-32 under 35 U.S.C. 112, second paragraph is withdrawn due to the amendments to claims 7 and 16, filed August 21, 2006.

**Rejection of claims 7-9, 14, 16, 18, and 22 under 35 U.S.C. 102(b) as being anticipated by Pachamuthu et al. (Tetrahedron Letters, Volume 39, May 1998, pp. 5339-5442)**

11. The rejection of claims 7-9, 14, 16, 18, and 22 under 35 U.S.C. 102(b) as being anticipated by Pachamuthu et al. (Tetrahedron Letters, Volume 39, May 1998, pp. 5339-5442) is withdrawn due to the newly added limitation "is a compound in which X in the first allyl compound is substituted with AO" in reference to the second allyl compound, in claim 7.

***Response to Arguments***

**Rejection of claims 7-16, 18-26 and 30-32 under 35 U.S.C. 112, first paragraph**

12. Applicant's arguments, see the first two paragraphs on page 10 of the response, filed August 21, 2006, with respect to the rejection of Claims 7-16, 18-26 and 30-32 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, have been fully considered and are persuasive. The rejection of Claims 7-16, 18-26 and 30-32 has been withdrawn.

**Rejection of claims 7-9, 14, 16, 18, and 22 under 35 U.S.C. 102(b) as being anticipated by Pachamuthu et al. (Tetrahedron Letters, Volume 39, May 1998, pp. 5339-5442)**

13. Applicant's arguments, see the last paragraph on page 10 of the response, filed August 21, 2006, with respect to the rejection of Claims 7-9, 14, 16, 18, and 22 under 35 U.S.C. 102(b) as being anticipated by Pachamuthu et al. (Tetrahedron Letters, Volume 39, May 1998, pp. 5339-5442) have been fully considered and are persuasive. The rejection of claims 7-9, 14, 16, 18, and 22 has been withdrawn.

**Rejection of claims 7-9, 14, 18, 22, 24, 30, 31 and 32 under 35 U.S.C. 102(b) as being anticipated by Woo (US 4,567,005)**

14. Applicant's arguments, see page 11 of the response, filed August 21, 2006, with respect to the rejection of Claims 7-9, 14, 18, 22, 24, 30, 31 and 32 under 35 U.S.C. 102(b) as being anticipated by Woo (US 4,567,005), have been fully considered and are persuasive. The rejection of Claims 7-9, 14, 18, 22, 24, 30, 31 and 32 has been withdrawn.

**Rejection of claims 7 and 23 under 35 U.S.C. 103(a) as being unpatentable over Woo (US 4,567,005)**

15. Applicant's arguments, see page 11 of the response, filed August 21, 2006, with respect to the rejection of Claims 7 and 23 under 35 U.S.C. 103(a) as being unpatentable over Woo (US 4,567,005), have been fully considered and are persuasive. The rejection of claims 7 and 23 has been withdrawn.

**Rejection of claims 7-9, 11, 14, 15, 18, 22-24, and 30-32 under 35 U.S.C. 102(b) as being anticipated by Trost et al. (US 4,051,157)**

16. Applicant's arguments filed August 21, 2006 have been fully considered but they are not persuasive.

The Applicants argue that Trost does not anticipate the instant invention because it directed to a process involving carbon nucleophiles. This argument is not persuasive because Trost also teaches the use of oxygen nucleophiles in addition to carbon nucleophiles (see column 4, line 50 to column 5, line 30).

The Applicants argument with regard to superior reactivity with oxygen nucleophiles is not persuasive because a showing of unexpected results is effective to rebut a rejection under 35 USC 103 not a rejection under 35 USC 102.

For the above reasons this rejection is maintained.

Rejection of claims 7-10, 16, 18, 22, 24, 25, 30-32 under 35 U.S.C. 103(a) as being unpatentable over Arend et al. (US 4,017,564).

17. Applicant's arguments, see last paragraph on page 12 of Applicants response, filed August 21, 2006, with respect to the rejection of Claims 7-10, 16, 18, 22, 24, 25, 30-32 under 35 U.S.C. 103(a) as being unpatentable over Arend et al. (US 4,017,564) have been fully considered and are persuasive. The rejection of Claims 7-10, 16, 18, 22, 24, 25, 30-32 has been withdrawn.

Rejection of claims 7-16, 18-26 and 30-32 under 35 U.S.C. 103(a) as being unpatentable over Kurtz et al. (US 3,755,451) alone or in view of Bryant et al. (US 3,534,088) or Hefner, Jr. (US 4,613,703).

18. Applicant's arguments filed August 21, 2006 have been fully considered but they are not persuasive.

The Applicants argue that Kurtz et al. do not suggest selection of specific phosphites of the formula (1). The Examiner disagrees. Kurtz et al. explicitly names phosphites of the formula (1). See column 8, line 54 to column 9, line 10. The showing in Table 1 and 2 is not sufficient to overcome the rejection because it is not commensurate in scope to the protection sought. The Applicants argue that Bryant also does not provide any suggestion or reasonable expectation of success for the claimed process. The Examiner disagrees. Bryant provides the motivation to utilize an ammonium compound with the claimed catalyst, i.e., higher yields, improved selectivity and catalyst stability. The Applicants argue that Hefner is non-analogous art because it does not disclose the catalyst of formula (1). This argument is not persuasive because just like the instant invention Hefner is directed to allylation

Art Unit: 1621

reactions. Further, Hefner is not being utilized for its teaching of the catalyst of formula (10, but for its teaching of the use of ammonium or phosphonium salts in allylation-reaction, which is the subject matter of instant claims 25 and 26.

For the above reasons this rejection is maintained.

***Conclusion***

19. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
